

STOCK TAKE MANAGEMENT SOLUTIONS PROVIDED IN PARTNERSHIP WITH STRATEGIC INDUSTRY PARTNERS

Forte Inventory Solutions (FIS) in partnership with MIC and software provider ADOR aims to provide inventory control for retailers in Namibia by making use of integrated software and scanner tools.

Forte Inventory Solutions takes accountability from the planning and managing all the way to the actual execution of each stock take event. Forte, in conjunction with each client's needs, shall schedule store stock takes over the requested period and ensure all pre-event communications and preparations are done. Forte provides the following aspects to each event: stock take software, SU and BIN labels, scanners and printer to ensure stock take events can take place in any location around Namibia.

Focus points from Forte Inventory Solutions:

COMPLETENESS

Documenting a detailed layout of the facility to count, and the reconciliation thereof (with ADOR stock count system), gives an audit trail of what and where it was counted, thus ensuring control of the completeness of the count.

ACCURACY

Forte provides several count methods (either bulk counts or scan unit and capture quantity or scan each and every unit's barcode), ensuring a high level of accuracy.

HANDS-ON APPROACH

Forte provides a event manager with system and floor administrators during each event and place focused and consistent focus on stock counters training and management.

PEOPLE. PROCESS. SYSTEMS IS OUR FORTE.
