- Generate invoices & integration to financial ERP
- Manage debtors and creditors
- Reporting for income vs expense per KM
- Expense purchase orders
- Incidents & Debriefing
- Manage vehicle and driver information
- Process POD
- Generate monthly sales and statistic reports
- Maintenance workshop module
- Diesel Module
- Export Financial ERP

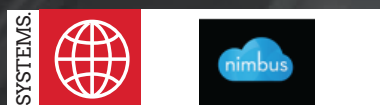

FORTE MAKES FURTHER USE OF OTHER STRATEGIC PARTNERS TO ACHIEVE THE BALANCE BETWEEN PEOPLE, PROCESS AND SYSTEMS.

ForTE Data Solutions provides integration platform-as-a-service, or iPaaS – via its cloud-based platform FLOW that enables users to connect applications regardless of whether they're on-premise or in the cloud without having to add layers to their infrastructure.

Papertrail brings advanced electronic document management technology to the market through our successful content and document management solutions. A fully customized solution so you can spend less time managing paper and more time being productive.

The Nimbus handheld offers control over aspects such as real time alerts and notifications from drivers and deviations or trip info and documents. The driver handheld offers the following benefits; barcode scanning by the handheld to manage waiting time at point of entry and improving security through visitors screening, electronic proof of delivery with specific workflow from the office to the driver.

The Driver Information Bureau (DIB) is designed as an online platform, whereby transporters can access a database when recruiting a driver by inserting an ID number and assessing the driver's references and previous driving history from on board computer companies. It aims to play a role at improving safety, wellness and efficiency on our roads in Southern Africa.

WiseTech Global is a leading provider of software solutions to the logistics industry globally. Their industry-leading technology, CargoWise One, is a deeply integrated software solution for logistics service providers that provide modules like forwarding, customs clearance and enterprise capabilities among others.

RTMS is an industry-led, voluntary self-regulation scheme that encourages consignees, consignors and transport operators involved in the road logistics value chain. This scheme is designed to preserve road infrastructure, road safety and increased productivity.

TomTom telematics is one of the world's leading telematics solution providers – recognised as the largest in the European market. They service drivers in more than 60 countries, giving them the industry's strongest local support network and widest range of sector specific 3rd party applications and integrations.

Bizzco has developed a number of tools to help supply chain companies map their business strategy with the work delivery of its personnel. Bizzco is an accredited SAQA training provider with MERSETA and MICTSETA, to provide a comprehensive solution to the training needs of different silo's within supply chain. Bizzco provides assessments, job profiling and training for all employees within the warehousing and logistics industry.

FORTE TRANSPORT SOLUTIONS OFFERS THE FOLLOWING SERVICES IN PARTNERSHIP WITH DATATIM

PROCESS DEVELOPMENT & IMPROVEMENT

Shadow current workflow methods and compare with best practice on a current system version. Ensure the process flow between departments is optimally designed for lean and effective operations. (As per adhoc request)

SYSTEM UTILIZATION & UPDATES

Continuous improvements on our software system use with the current features available or introduction to new modules or specifications for customizations. (As per adhoc request)

FORTE INSIGHT

Monthly evaluation on a client's status for system & process utilization. The client status will combine support tickets history system customizations and overall use of our software when users are shadowed during visit. Forte can then offer such clients a dashboard that shall provide insight on areas for training and future system improvements. (Monthly retainer)

PEOPLE. PROCESS. SYSTEMS IS OUR FORTE.
