FORTE™
## SUPPLY CHAIN CONSULTING

PEOPLE. PROCESS. SYSTEMS.

Forte Supply Chain Consulting is a supply chain consultancy for the logistics and distribution sectors which provides the most complete service for a company to either take its first step into an automated environment or move companies already automated to a fully integrated solution.

Supply Chain

Currently, the **Forte Consulting group** consists of four main divisions. **Forte Data Solutions** provides a web-based platform that facilitates integration for different software partners of each division via the platform FLOW.

Forte Transport Solutions is the sole accredited provider of the customisable transport management system Datatim and a certified implementation partner for CargoWise One, a deeply integrated global software solution for logistics service providers. **Forte Warehouse Solutions** is the accredited provider of Ador warehouse management systems and Macro warehouse and container management systems. **Forte Inventory Solutions** in partnership with MIC, is responsible for retail inventory control.

At **Forte Consulting**, we believe in advancing lean and effective operations within all departments of the supply chain we approach. **Forte Consulting** places emphasis on

triggering a company from inside to clear unnecessary hassles by applying the relevant software system. Project managers approach each software implementation by fully understanding each venture's struggles, observing from an industry perspective and then selecting the best software fit for each project.

The aim is to advance technological improvements in each company, whilst addressing the need for integrations to complete a seamless implementation. Our business vision is to combine and apply the combination of people, process and systems when implementing industry specific software solutions at each company.

Currently, offices are located in Johannesburg, Cape Town and Namibia which services our clients throughout the Southern Africa region.

MOVE FORWARD>DIGITALLY

FORTE™
DATA SOLUTIONS

FORTE Data Solutions provides integration platform-as-a-service via its cloud-based platform FLOW which enables users to connect applications regadless of whether they are on premises or in the cloud.

F LOW™

FLOW acts as a cutting-edge, cloud-based intergration platform which provides flexibility and speed with complete industry-standard intergration options. It is a powerful communications portal fluent in a wide variety of data transfer protocols and standards. FLOW moves data across enterprises seamlessly, connecting different roleplayers into one cohesive FLOW platform.

FORTE™
TRANSPORT SOLUTIONS

FORTE Transport Solutions makes use of different partners to optimise the use of software to cater for all departments within a transport company.

DATATIM

Datatim specialises in the development of customised software solutions for the logistics industry. The system functionality ranges from operational admin & scheduling to invoicing and integration with financial ERP.

CargoWise Certified Professional

WiseTech Global is a leading provider of software solutions to the logistics industry globally. Their industry-leading technology, CargoWise One, is a deeply integrated software solution for logistics service providers that provide modules like forwarding, customs clearance and enterprise capabilities among others.

FORTE™
WAREHOUSE SOLUTIONS

FORTE Warehouse Solutions specialises in inventory management and processing within different fields of warehouse management.

ADOR Logistic Software Solutionaries

Ador-IT is a proudly SA Warehouse Management System developer since 2010. Ador supply cost effective, turnkey solutions for inventory management and processing.

MACRO 2000

Macro 2000 provides software to manage your warehouse processes from cold store management right through to distribution for in-house or third parties.

FORTE™
INVENTORY SOLUTIONS

FORTE Inventory Solutions in partnership with MIC and software provider ADOR aims to provide inventory control for retailers in Namibia by making use of integrated software and scanner tools.

MIC MOBILE INVENTORY COLLATION

Forte Inventory Solutions takes accountability from the planning and managing all the way to the actual execution of each stock take event. Forte in conjunction with each client's needs, shall schedule store stock takes over the requested period and ensure all pre-event communications and preparations are done. Forte provides the following aspects to each event: stock take software, SU and BIN labels, scanners and printer to ensure stock take events can take place in any location around Namibia.

> "Supply chain software implementation is our Forte."
