

## WAREHOUSE MANAGEMENT SOLUTIONS PROVIDED IN PARTNERSHIP WITH STRATEGIC INDUSTRY PARTNERS

Forte Warehouse Solutions (FWS) serves as a bridge consultancy between industry expectations and software offerings within the warehouse industry. FWS has partnered with specialized software providers and remains responsible for the implementation and the utilization of these software systems from an industry perspective.

Each project starts with a process design that leads to development, implementation and training. Continuous improvement remains the focus thereafter. **Forte Warehouse Solution's** onsite consultant navigates each client through all steps of the project plan.

These services include client relations management, continuous improvement planning, accredited training and implementations for current and new clients.

## FORTE WAREHOUSE SOLUTIONS OFFERS POST IMPLEMENTATION SUPPORT IN THE FOLLOWING WAYS:

### SUPER USER TRAINING

Specific training with assigned superuser and refresher training for allocated users via pre-determined training schedule per visit.

### SYSTEM UTILISATION

Continued improvement on the system use and benchmarking current procedures with latest system trends for new development.

### DATABASE MAINTENANCE

Database archiving for increased speed and functionality. Backup and restore for healthy database.

Ador supply cost-effective, turnkey solutions for inventory management and processing, using their own created products.

**FORTE FURTHER MAKES USE OF OTHER STRATEGIC PARTNERS TO ACHIEVE THE BALANCE BETWEEN PEOPLE, PROCESS AND SYSTEMS.**

Bizzco has developed a number of tools to help supply chain companies map their

business strategy with the work delivery of its personnel. Bizzco is an accredited SAQA training provider with MERSETA and MICTSETA, to provide a comprehensive solution to the training needs of different silo's within supply chain. Bizzco provides assessments, job profiling and training for all employees within the warehousing and logistics industry

Forte Data Solutions provides integration platform-as-a-service, or iPaaS – via its cloud-

based platform FLOW that enables users to connect applications regardless of whether they're on-premise or in the cloud without having to add layers to their infrastructure.

**PEOPLE. PROCESS. SYSTEMS IS OUR FORTE.**
